

Advance-Nilfisk Parts

Advance-Nilfisk Part - Imagine how long and tiresome it would be to clean-up after a party, without assistance from equipment. Previously, the dirt from upholstery and carpets had to be beat out of them manually; cleaning cloths, brooms, and brushes were the best cleaning products back then.

P.A. Fisker, the founder of Nilfisk-Advance, was an electrical engineer who really loved working with electrical motors. Establishing the business in the year 1906, he started to produce motors to drive drills, fans, machine tools and coffee grinders. Mr. Fisker's dream from the beginning was to have an international business selling goods internationally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning trade. Mr. Fisker invented a remarkable, ground breaking vacuum cleaner which can be operated by a single individual for the reason that it just weighed 17.5 kilos! This invention came in a time where other cleaning equipment were massive and needed at least 4 operators, hence, the Nilfisk C1 changed everything and evolved the method we clean forever. The brain behind these very first cleaning equipment remains unparalleled. Cleaning machines offer a brilliant solution to an existing dilemma; things get dirty and have to be cleaned frequently, without a lot of effort.

Slowly but steadily, Nilfisk-Advance expanded through the years. During the nineteen eighties, this expansion actually took place the time the business became a part of the NKT Group. Their new owners' ambition and motivation made Nilfisk-Advance take a huge leap forward within the trade, aiming to be among the leading global players in the market of professional cleaning equipment. Nilfisk-Advance is presently located in all parts of the world due to steadily obtaining numerous small companies in order to develop their product portfolio and presence in new markets. They are proud to provide a variety of cleaning solutions to meet each requirement.
