

## JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Recently retired, after spending several years working with his brother to build their crane company into an industry leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

During their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could swiftly and securely elevate individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into current versions.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into a range of markets globally and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
