

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts can be purposely marked to be utilized in unsafe sites. A labeled forklift denotes the design has met the least standards of ANSI/UL 558 meant for engine powered lift trucks or ANSI/UL 583 used for electric trucks for the type of label placed.

The use for labels for lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Ask your local insurance carrier and Fire Marshall for more information concerning the approved uses of industrial powered trucks in your application.

If the particular forklift satisfies the outlined criteria, labels could be placed. A labeled forklift will show the type of designation located on the nameplate and would have a properly corresponding label put.
